PITCH DECK · EXPO 7 · USC MARSHALL MSBA

Roundtable

Every view counts.
One plan.

An AI facilitator that helps teams think together, inside the group chat they already use.

Group chats let the first answer win because not all opinions are heard

SYMPTOMS

- Quieter members drop out
- Idioms and tone get misread
- Asking in public feels risky
- Decisions get buried

ROOT CAUSE

Speaking up in chat costs something, and staying quiet costs nothing.

03 · USER EVIDENCE

Students told us where team chats break and what would make them trust a bot

20
students surveyed on their team chats

75%
report progress is delayed because no one takes responsibility for making a decision

90%
report the key pain point: quiet voices dropping out

HYPOTHESIS

A neutral, private-first facilitator helps every view reach the decision.

Roundtable is a neutral facilitator that lives in the chat teams already use

PROBLEM

First answers win and messages get misread.

CUSTOMERS

MSBA teams of 3–5, especially mixed-language ones.

VALUE

Every view counts. One plan.

SOLUTION

Private rounds, private clarify, owned tasks.

CHANNELS

A bot in the team chat, assigned by faculty.

Roundtable stays quiet until a decision is underway, then asks before it acts

1

Listens

Scans recent messages for a decision in progress.

2

Asks

Roundtable kicks off the round and gets the team to an actual decision.

3

Collects

Each member shares a one-line view in private.

4

Reveals

Posts the spread and the strongest minority case.

5

Logs

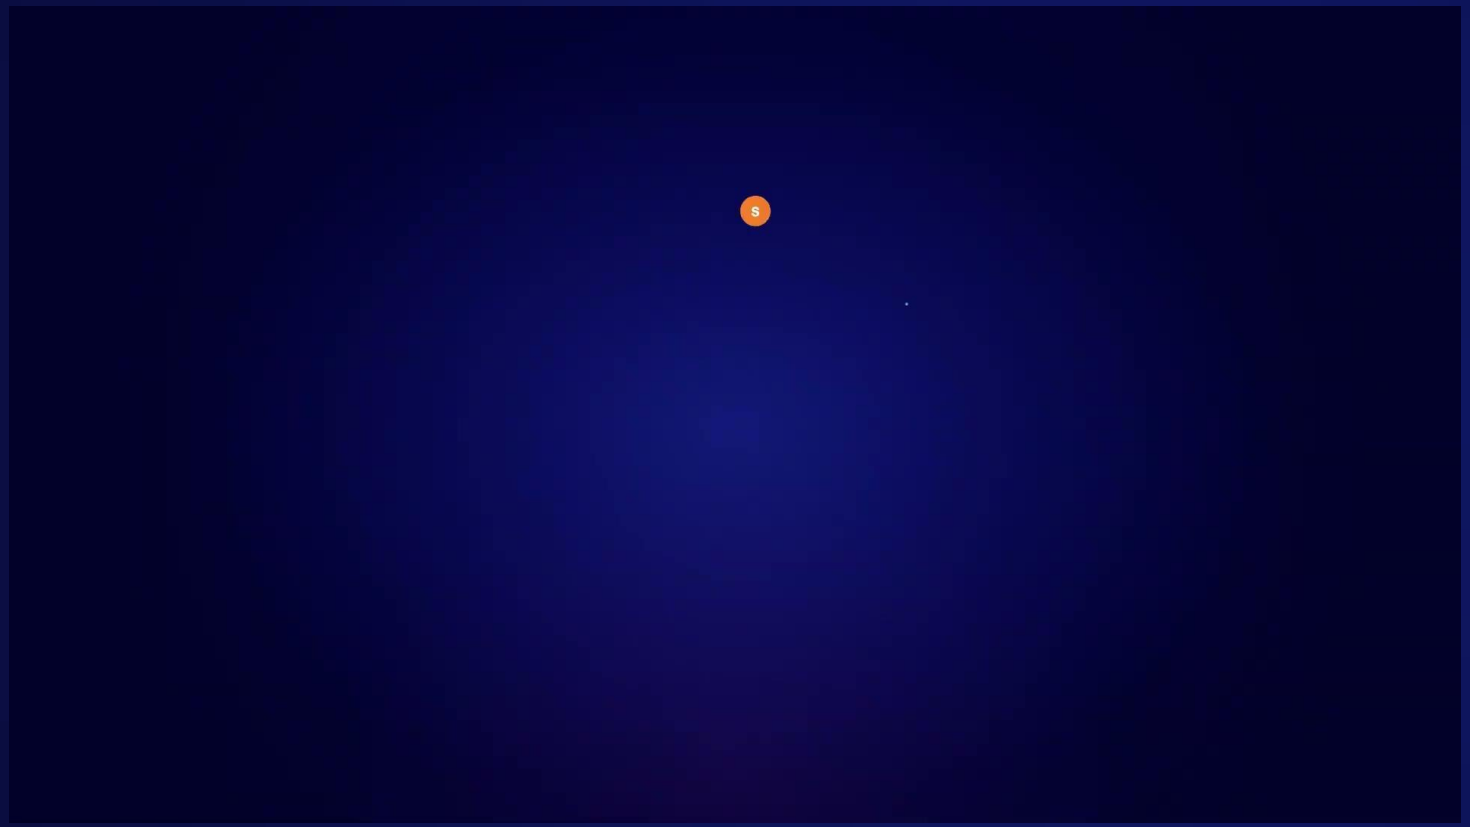

The team confirms; Roundtable records outcome and owner.

06 · PRODUCT DEMO

In one minute, a team decides, assigns owners and clarifies a message in private

1. Private round
2. Spread and trade-off
3. Owned tasks
4. Private clarify

Join our discord server to try it out!

Video Link

The design follows the research: AI improves team process and people stay in charge

WHAT RESEARCH SAYS

Facilitation surfaced more information

Alsobay et al., 2025

Private 1:1 prompts draw out quiet members

Do, Kong, Lee & Bailey, 2022

Teams perform better when members take turns more equally

Woolley et al., 2010

WHAT WE BUILT IN

- ✓ Opt-in, asks first, pausable by anyone
- ✓ Stores decisions, tasks and dates, not chat
- ✓ Private clarify shows only to the asker
- ✓ Everyone is asked for opinions privately

So we claim better process and ownership, not automatically better answers.

We tested Roundtable with 20 real students against four goals and acted on their feedback

Goal	Before Roundtable (1-5)	Expected with Roundtable
How well decisions were made	2.8	4.3
All members participated in all rounds	2.3	4.5
Minority view surfaced	1.9	4.1
How often you faced misunderstandings	3.8	1.7

We changed: A new re-open feature that allows re-voting on previous decisions.

Metrics were calculated using an average of all individual ratings per each goal.

09 · GO TO MARKET

A free pilot earns a department license, and its results carry Roundtable further

1 · PILOT

A free semester pilot

Professors assign it in 1–3 MSBA courses, judged on our four pilot goals.

2 · PROTECT

Privacy terms on day one

Decisions, tasks and dates only, never chat; deleted on request.

3 · LICENSE

A flat department license

Annual, priced by enrollment tier, once the pilot goals are met.

4 · EXPAND

More programs, more schools

Other Marshall programs, then USC schools, with the pilot as our case study.

ROUNDTABLE

Every view counts. One plan.

A neutral facilitator that keeps every MSBA team member heard and in charge.
